# WE BEYOND

the app that makes your mission-driven work better

**Bad News** 

60%

failure rate of water wells (in Africa only)

# \$1.2 Bil

total investment loss in handpumps alone

## **Good News**

70%

45%

of adults own smartphones in developing countries

of Sub-Saharan Africa has 3G coverage

# **Bridging the Gap**

# **Beneficiaries** (users)

Users are incentivized to accurately and continuously participate not only out of self-interest, but because they can more effectively and efficiently conduct trainings and see results.

# NGO'S (you)

Clients receive real time reporting on the effectiveness of their development programs. This helps them not only improve their impact, but also – critically – respond to and cultivate increasingly sophisticated and scrupulous donors.

System specific diagnostics

Maintenance checklists

WASH & community trainings

Features

Project & impact reporting

Ticket support & remote expertise

# **Client Outcomes**

## **Cost-Savings in** Maintenance & Repair of Water Systems

Well Beyond app reduces water system issues needing a technician, as well as save on funding of technician repairs so that NGO's can use that funding for other programmatic work.

## **Reduction in Down-Time of** Water Systems

When the water is not flowing from the well, everyone suffers. Using the Maintenance & Diagnostic features of the Well Beyond app minimizes the time spent without water from this vital resource.

## Training **Tracking in Real** Time

Increasing documentation of training and results of training in real-time enables our clients to reduce costs of manual feedback and reporting, as well as costs of team time.

## Program Improvement Indicators

Through the analytics dashboard, key indicators of program strengths and weaknesses are evident and actionable. Metrics on programmatic outcomes informs the NGO's team immediately of program needs.

provides immediate impact reporting for large funders.

- Customized training modules
- Management User Dashboard
- Dedicated Account Manager

# Enterprise

For large multi-region teams.

Everything we can do to empower you and support your mission.

- Unlimited Client Administrator and Manager User seats
- Advanced Analytics
- Custom designed training modules and water system maintenance & diagnostics

# Testimonials

"

"Prevention is better than cure, and that's why the app has proven to be a great necessity in our community" -Naomi, Community User Press

# Forbes The Washington Post

## Partners

The app has proven to be a great necessity in our community. The WASH tool is really great especially the option of training a group, it is relatively simple to train quite a large group. And the Swahili version has made it easier for the message to reach everyone despite their literacy level and economic background.
